

Georgia Kakourou is a Clinical PGT scientist and Postgraduate Associate at the University of Athens (UoA) Laboratory of Medical Genetics, Choremio Research Laboratory, in "Aghia Sophia" Children's Hospital, Athens, Greece, since 2009. She obtained her BSc in Biomedical Sciences from the University of Westminster, UK (honours) and her MSc and PhD in Human Genetics from University College London, UK. Between 2002-2009 she worked at the "UCL Centre for PGD" undertaking mainly PGT for monogenic disorders. Since then, she continues to be involved in preimplantation genetic testing at UoA, as well as studies in the field of reproductive genetics, including studies and activities of ESHRE specialized groups. She has been an active member of the Steering Committee of the Special Interest Group "Reproductive Genetics" of the European Society of Human Reproduction and Embryology (ESHRE) since November 2013, where she has served in different positions, junior deputy (2013-2015), senior deputy (2015-2017), co-ordinator (2017-2019), immediate past co-ordinator (2019-2021) and currently as Basic Science Officer (2022-2024).

She has several academic activities such as teaching in seminars, workshops, MSc educational courses and MSc and PhD student supervision. She has contributed to original articles, book chapters and websites and serves as a reviewer for several journals in the field of reproductive genetics.
