

Yannis Panagiotidis, Phd

Yannis Panagiotidis, born and raised in Athens, is a Greek Clinical Embryologist and currently serves as the Laboratory Director at IAKENTRO. In 1998, he successfully completed his undergraduate studies at the Department of Biology at Aristotle University of Thessaloniki. His professional journey commenced at the Assisted Reproduction Unit "IAKENTRO" in Thessaloniki, where he assumed the role of an embryologist.

Over the years, Yannis has pursued advanced training across various laboratories in both the United States and Europe, focusing on a comprehensive spectrum of assisted reproduction techniques. His expertise particularly extends to areas such as embryo biopsy, preimplantation diagnosis, and the cryopreservation of embryos and oocytes. Since 2003, he has been at the helm of the team of embryologists at IAKENTRO laboratories, showcasing exemplary leadership and commitment.

In 2013, Yannis Panagiotidis achieved a significant academic milestone by successfully defending his doctoral thesis on vitrification protocols for the cryopreservation of oocytes and embryos. His dedication to advancing the field is evident through his extensive involvement in numerous scientific publications and presentations, both on the national and international stage.

Outside of his professional commitments, Yannis is happily married and is the proud father of two wonderful daughters.
